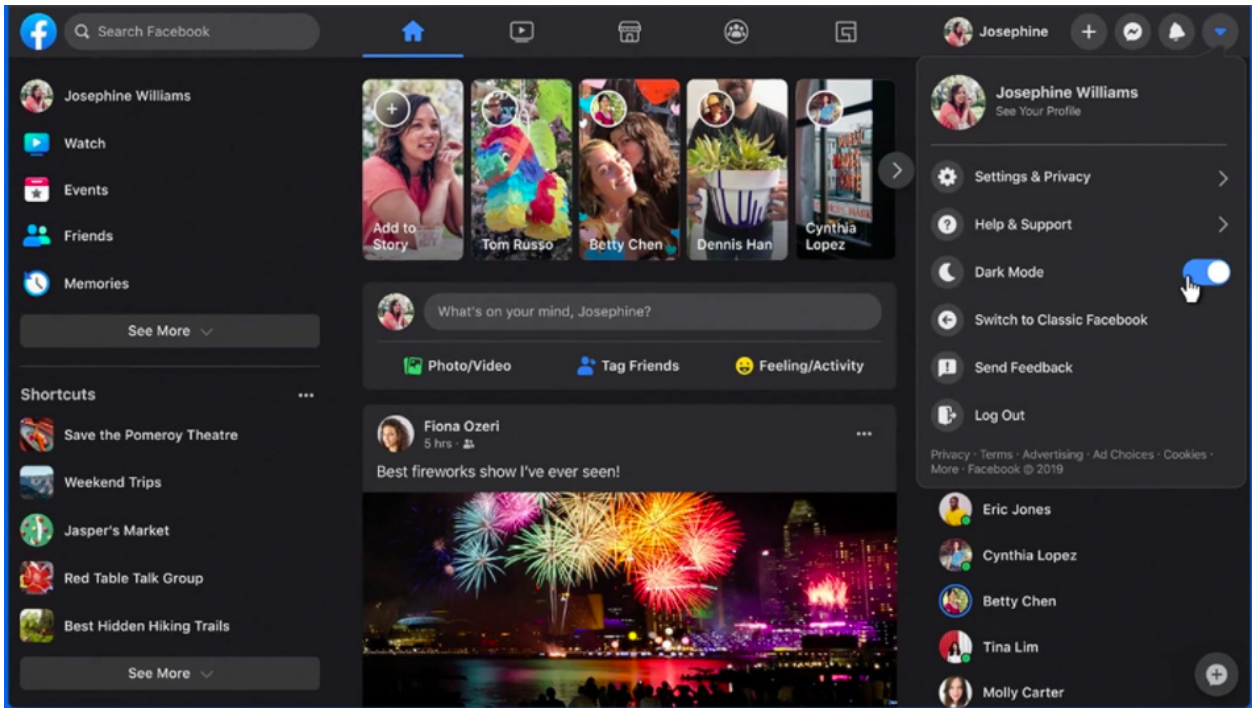
Project for Edureka

By Ami Barot

Project Name: let's talk

(a project based on Facebook)



This acts a representational screenshot of the Facebook for the "Let's Talk" project which is going to be implemented and the final result might not be exactly the same

Overview:

Let's talk will be a social-media platform, based on Facebook, where users can share about their lives to the people out there in the platform itself. It helps them connect to their near and dear ones, provided they are all on the platform. They can post statuses, photos, videos, have one-to-one conversation and many other things.

Goals:

1. Login and Registration
2. Status Feed (with the provision of posting statuses, viewing stories)
3. Chat List (with the provision of opening direct message to specific friend)
4. User's Profile and Friend's Profile (with the provision of viewing the friend list, activities and user's own statuses)
5. Account Settings

   And etc.
